

European
College
of Veterinary
Microbiology

Providing specialist
training and certification of
veterinarians in
veterinary microbiology
in Europe.

Enter the next level!

ECVM Specialists

- serve the veterinary patient, its owner and the public,
- provide expert care for animals with infectious diseases,
- conduct research and contribute to knowledge in all aspects of veterinary microbiology,
- promote the communication and dissemination of this knowledge,
- provide supervision and assessment of continuing training programmes in veterinary microbiology across Europe.

Your way to become a specialist

Enrole in an approved ECVM residency programme which allows a graduate veterinarian to acquire in-depth knowledge of veterinary microbiology and its supporting specialties under the guidance and supervision of ECVM Diplomate(s).

The minimum length is three years.

Standard Residency Programme - ECVM (ecvmicro.org)

Alternate Residency Programme - ECVM (ecvmicro.org)
